*Information Disclosure Statement*

1. The IDS filed on July 9, 1999 has been considered, but the copy of the Motorola reference published on April 21, 1996 is not completely legible. To the extent that the information disclosed in the reference dated April 21, 1996 is the same as the information in the Motorola reference published on June 24, 1995, the former reference has been considered.
2. The status of this reference cannot be understood without a brief summary of its prosecution history. The reference was first cited on a Form 1449 submitted as part of paper number 14 filed on September 16, 1997. The reference was not considered because no copy was provided. It should also be noted that the reference's date is not cited properly on paper number 14.
3. Since the reference appeared to have been lost by the PTO, the Examiner only required the Applicants to submit copies of the nonpatent literature. The Applicants attempted to provide a copy in paper number 17, filed on July 9, 1999, but failed to find a legible copy of the reference dated April 21, 1996 either in their files or on the Internet. The Applicants therefore submitted copies of both references in paper number 17 an incompletely legible copy of the reference dated April 21, 1996 and a legible copy of a reference dated June 24, 1995. The Applicants then alleged that the earlier reference appears to disclose the same material. To the best of the Examiner's ability, the Applicants' allegation appears to be true. The

reference submitted as an attachment to paper number 23 is a copy of the reference dated June 24, 1995 and not a copy of the reference dated April 21, 1996.

***Examiner's Amendment***

4. An Examiner's Amendment to the record appears below. In a telephone interview on October 22, 1999, the Applicants' attorney Scott Rhoades, Reg. No. 44,300, authorized the Examiner's amendment to fix specification problems concerning Figures 5-1 and 5-2 and IDS citation problems in paper number 17. The Examiner corrected the date of the second reference listed on the Form 1449 as part of paper number 17 based on the true p.

5. The amendments to the title and abstract are made at the Examiner's initiative and without the Applicants' prior authorization pursuant to MPEP §§ 606.01, 608.01(b), and 1302.04.

6. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

7. In the specification:

On page 7 at line 17, delete "FIG. 5" and insert "FIGS. 5-1 and 5-2"

On page 23 at line 22, delete "FIG. 5" and insert "FIGS. 5-1 and 5-2"

On page 23 at line 26, delete "FIG. 5" and insert "FIGS. 5-1 and 5-2"

8. Pursuant to MPEP 606.01, please change the title to:

SERVER AND INSTANTANEOUSLY GENERATING ALERTS UPON  
RECEIPT REGARDLESS OF WHETHER THE RECEIVER IS ON OR OFF

ABSTRACT

A system and method for data communication connecting on-line networks with on-line and off-line computers. The present system provides for broadcast of up to the minute notification centric data thereby providing an instant call to action for users who are provided with the ability to instantaneously retrieve further detailed information. Information sources transmit data to a central broadcast server, which preprocesses the data for wireless broadcast. The notification centric portions of data are wirelessly broadcast to wireless receiving devices that are attached to computing devices. Upon receipt of the data at the computing device, the user is notified through different multimedia alerts that there is an incoming message. Wirelessly broadcast URL's, associated with the data, are embedded in data packets and provide an automated wired or wireless connection back to the information source for obtaining detailed data.
